## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to methods of preventing or treating atherosclerosis, classified in class 514.
- II. Claims 32-38, drawn to a prosthetic device suitable for implantation, classified in class 424.
- III. Claims 39-42, drawn to a method for the production of a prosthetic device, classified in class 623.

Inventions in Groups I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of Group I is different from the invention of Group II because each requires a different classification. Group II is different from Group III because the search required for Group II is different from the search required for Group III. Group I is different from Group III because each groups requires a different classification.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
